Subject: RE: Gen X Data near Chemours-Washington Works Facility

Thank you Jenny. Tom is already on leave for the holidays so he may not respond until you get back.

And thank you for sharing the data and I totally understand the timing is not great, so we appreciate whatever you can get out before the holidays. Worst case, we pick it back up in the new year

Good luck wrapping things up

Marc

Hi Marc,

I left a voice mail with Tom Speth yesterday. My goal is to try to get you any additional GenX data I have before the government shuts down (if it does). However, I am on detail as the Regional Administrator's Special Assistant and I might not have time before Friday because I am in the last two weeks of my detail and there are items that need to be finished.

Also, if you have future questions about the SDWA 1431 Order, it is my case so please feel free to ask me directly.

Thank you,
Jenny

Jennifer Wilson, P.E.

Thank you Kim. Tom is out of the office for the holiday. But we will take a look and get back with you and Jenny if there is follow up. Glad you were able to participate in the call yesterday

Marc

Subject: Gen X Data near Chemours-Washington Works Facility

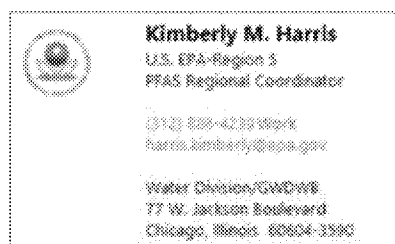

Hi Tom,

As discussed, R3 & R5 requested that Chemours sample for Gen X near the Washington Works facility in January 2018, May 2018 and September 2018. The January results for samples collected at 10 private wells and 4 PWSs were posted at: **Ex. 6 Personal Privacy (PP)** and for your convenience, I've pasted them below.

We found that the pretreatment results ranged from ND-81 ppt and GAC treatment removed the contaminant to ND levels.

Jenny Wilson, with R5, is our technical contact for this effort and will be following up with you to provide data results received after January 2018.

Take care,
Kim
